**HIGHLAND PROJECT LOGISTICS ANNOUNCES SHIPMENT OF
45 BLADES FOR 15 WIND TURBINES FOR VESTAS TO THE DOMINICAN REPUBLIC**

(Londonderry, NH) – Highland Project Logistics (Highland Project) is pleased to announce the shipment of 45 blades for 15 state-of-the-art wind turbines leaving the United States to Cabo Rojo, Dominican Republic as part of a global contract with VESTAS. The shipment departed Houston port yesterday July 28, 2015.

VESTAS USA, a subsidiary of VESTAS Denmark, is one of the largest windmill manufacturers in the world. Highland Project was contracted to shuttle 45, 180ft long windmill blades in specialized trucks from their origin in Brighton, CO to Houston, TX – a streamlined process that was expedited for completion in only three weeks. The blades were then loaded onto a charter vessel that left from Houston to Cabo Rojo destined for a new wind farm in Dominican Republic.

“The selection of Highland Project by VESTAS’s contractor for this large-scale project reinforces our reputation for quality and reliability in our oversized and project cargo services,” says Radek Maly, President of Highland Project Logistics. “It also reinforces our continued growth locally, in New Hampshire, and globally.”

About Highland Project Logistics and Highland Forwarding

Highland Project Logistics, established in 2011 as a sister company of Highland Forwarding, specializes in oversized and project cargo. Highland Forwarding provides exceptional international freight forwarding and logistics services for businesses across the US and worldwide, specializing in transportation of overseas shipments by air or ocean, customs clearance, and import/export coordination. Highland Forwarding is an FMC licensed freight forwarder, IATA air cargo agent, and US Customs licensed broker.
